

Training that produces Champions who are responsible for coordinating a business roadmap to successfully achieve optimum Six Sigma results within their organization.

Characteristics of a Champion

The Champion will acquire the skills and tools to select projects, implement improvements, execute control, and alleviate roadblocks to success. The goal of this training is to increase your knowledge of the Champion roles and responsibilities to effectively lead a team of Black Belts. As a Champion, you will learn to identify the elements of a well-written business case as well as learn the importance of project selection. Finally, you will learn about the tools used to complete successful projects as well as your responsibilities throughout the DMAIC process.

The Program

This 2-day training event is intended to produce Champions who are responsible for coordinating a business roadmap to successfully achieve optimum Six Sigma results within their organization. The Champion will acquire the skills and tools to select projects, implement improvements, execute control, and alleviate roadblocks to success.

Six Sigma Qualtec has pioneered the development of Six Sigma methodology for a multitude of companies, and we continue to lead successful deployments that can drive lasting change within your organization. Upon completion of training, the Champion not only has developed superior problem-solving skills that can be immediately applied, but has also completed a project that yields significant bottom line savings.

After This Training, A Champion Will Understand:

- Six Sigma as a Methodology and it's Tools
- Six Sigma In Practice
- The Typical Roadmap
- Project Selection
- Black Belt Deliverables

With Six Sigma Qualtec's Comprehensive Training, Champion Candidates Will Be Able To:

- Assume the Champion roles and responsibilities
- Manage the project selection process
- Employ new management skills to lead change in your business environment
- Be effective project leaders
- Feel empowered to make changes in project focus
- Remove roadblocks associated with projects
- Influence the leaders of support functions needed for project completion
